

About Thoughtworks

Thoughtworks is a dynamic and inclusive community of bright and supportive colleagues who are revolutionizing tech. As a leading technology consultancy, we're pushing boundaries through our purposeful and impactful work. For 30+ years, we've delivered extraordinary impact together with our clients by helping them solve complex business problems with technology as the differentiator. Bring your enthusiasm for learning and passion for quality engineering to Thoughtworks. Together, let's be extraordinary.

A few important things to know

Learning & Development

There is no one-size-fits-all career path at Thoughtworks: however you want to develop your career is entirely up to you. But we also balance autonomy with the strength of our cultivation culture. This means your career is supported by interactive tools, numerous development programs and teammates who want to help you grow. We see value in helping each other be our best and that extends to empowering our employees in their career journeys.

Responsible Use of AI in Recruitment

At Thoughtworks, we use AI tools to support our recruitment team with administrative tasks such as drafting communications, scheduling interviews and writing job Descriptions.

Crucially, our AI tools do not screen, assess, rank or make hiring decisions. Every application is reviewed by our team and all selection decisions are made exclusively by our interviewers and hiring managers.

We are committed to fairness and responsible AI. We actively manage our AI systems by testing, monitoring for biased outcomes and implementing mitigation measures. We hold our third-party vendors to these same high standards through a rigorous governance process.

Job Role 1: QA Intern

Job responsibilities

- Assist in testing web and mobile applications to ensure quality and functionality.
- Write and execute test cases, test scenarios, and test plans based on requirements.
- Identify, log, and track bugs using defect management tools.

- Collaborate with developers and product teams to understand features and validate implementations.
- Perform manual testing and support basic automation testing efforts where applicable.
- Validate UI, usability, and overall user experience across devices and browsers.
- Participate in regression testing and support release cycles.
- Continuously learn and apply QA best practices, testing methodologies, and tools.

Job qualifications

Technical Skills

- Basic understanding of software testing concepts (manual testing, test cases, bug lifecycle).
- Familiarity with web and mobile application testing.
- Knowledge of SDLC and STLC processes.
- Exposure to testing tools (e.g., JIRA, TestRail, or similar) is a plus.
- Basic understanding of automation tools (Selenium, Cypress, etc.) is preferred.
- Understanding of API testing basics (Postman or similar tools) is a plus.

Professional Skills

- Strong attention to detail and analytical thinking.
- Curiosity to explore, question, and identify edge cases.
- Good communication and collaboration skills.
- Willingness to learn and adapt in a fast-paced environment.
- Ability to work effectively within a team.

Job Role 2: UI Developer Intern

Job responsibilities

- Assist in building responsive and user-friendly web interfaces using modern front-end technologies.
- Translate UI/UX designs (Figma or similar tools) into clean, functional, and reusable code.
- Collaborate with designers and developers to implement intuitive and visually appealing user experiences.
- Write well-structured, maintainable code following best practices.
- Support in debugging, testing, and optimizing front-end performance across browsers and devices.
- Contribute to building and maintaining reusable UI components and design

- systems.
- Participate in code reviews and team discussions to continuously improve
- development practices.
- Stay updated with emerging front-end trends, tools, and technologies.

Job qualifications

Technical Skills

- Basic understanding of HTML, CSS, and JavaScript.
- Familiarity with responsive design principles and modern web standards.
- Exposure to front-end frameworks/libraries such as React, Angular, or Vue (preferred).
- Understanding of version control systems (Git).
- Ability to convert design mockups into functional UI components.
- Basic knowledge of web performance and accessibility best practices.

Professional Skills

- Strong attention to detail and design sensitivity.
- Willingness to learn and adapt in a fast-paced environment.
- Good problem-solving and analytical skills.
- Effective communication and collaboration abilities.
- Enthusiasm for building user-centric digital experiences.

Job Role 3: QA Intern - AI Works

Job responsibilities

- Assist in executing test plans for new features, including AI-driven functionalities,
- alongside senior QA engineers.
- Support automation testing efforts using tools such as Playwright, Selenium, or Cypress.
- Perform API testing to validate system integrations and data flow.
- Document bugs and issues using tools like Jira, Trello, or GitHub, including
- detailed logs and screenshots.
- Conduct regression testing to ensure system stability after updates or changes.
- Test AI systems by crafting and experimenting with prompts to identify incorrect,
- unexpected, or biased outputs.
- Collaborate with cross-functional teams to understand product features and
- ensure quality delivery.

- Continuously learn and apply QA best practices, tools, and methodologies.

Job qualifications

Technical Skills

- Basic understanding of software testing concepts (manual testing, test cases, bug lifecycle).
- Familiarity with web technologies (HTML, CSS, client-server architecture).
- Exposure to automation tools (Selenium, Cypress, Playwright) is a plus.
- Basic knowledge of API testing tools (Postman or similar).
- Understanding of programming languages such as Python, Java, or JavaScript is a plus.
- Awareness of databases (SQL/MongoDB) is good to have.

Professional Skills

- Strong attention to detail with a natural ability to identify edge cases.
- Curious mindset with an interest in exploring how systems behave under different scenarios.
- Interest in AI tools and technologies (e.g., ChatGPT, Claude, Midjourney).
- Ability to think critically and approach problems with a tester's mindset.
- Strong communication skills to clearly articulate issues and findings.
- Willingness to learn and adapt in a fast-paced environment.

Job Role 4: AI Research Intern (Dev Researcher)

The Opportunity

Thoughtworks is looking for an AI Research Intern to support the exploration and prototyping of next-generation AI capabilities within the AI/works™ platform. In this role, you will work closely with experienced engineers and researchers to experiment with emerging AI concepts and help translate them into practical applications.

This is a hands-on learning opportunity to work at the intersection of AI research and software engineering, where you will contribute to building prototypes, testing ideas, and understanding how cutting-edge AI innovations can be applied in real-world systems.

Job responsibilities

- Support research and experimentation on emerging AI concepts such as agentic

- workflows, reasoning systems, and multimodal AI.
- Assist in building and testing prototypes related to AI models and applications.
- Explore techniques like prompt engineering, retrieval-augmented generation (RAG), and basic agent workflows.
- Help evaluate AI models based on parameters such as accuracy, performance, and usability.
- Contribute to documenting findings, learnings, and experiment results.
- Collaborate with cross-functional teams including engineers, designers, and researchers.
- Stay updated with the latest trends in AI by exploring research papers, tools, and frameworks.

Job qualifications

Technical Skills

- Currently pursuing a degree in Computer Science, AI/ML, Data Science, or a related field.
- Basic understanding of machine learning and AI concepts.
- Familiarity with Python or any programming language.
- Exposure to AI tools or platforms (e.g., ChatGPT, Hugging Face, etc.).
- Basic understanding of APIs, data structures, and algorithms.
- Interest in exploring areas like LLMs, prompt engineering, or AI agents is a plus.

Professional Skills

- Strong curiosity and willingness to learn new technologies quickly.
- Analytical mindset with an interest in experimentation and problem-solving.
- Ability to work collaboratively in a team environment.
- Good communication skills to articulate ideas and findings clearly.
- Comfort working in an exploratory and evolving environment.
